Response to Amendment

1. This Office action is responsive to Applicant's amendment filed on February 25, 2004.

Claims 3-15 are pending.

2. Applicant's arguments with respect to claims 3-15 have been considered but are moot in view of the new ground(s) of rejection.

Claim Objections

3. Claims 3 and 8 are objected to due to the following informalities:

As per claim 3, in lines 6-7, the language "wherein the data is exchanged during a call" is redundant since it has already been recited, in line 5, that the data is exchanged during a call.

Claim 8 is objected to because it is dependent upon a claim (claim 1), which has been canceled.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Chang et al. (0-7803-3692, IEEE 5/96, hereinafter "Chang").

As per claim 3, Chan teaches the claimed method to authenticate a mobile station in a mobile network comprising: authenticating the mobile station with user-to-user data exchange;

and exchanging the data during a call set-up or during a call (page 1254, column 2, last paragraph).

As per claims 4 and 5, Chang also teaches that an encryption key is agreed between the mobile stations and that the mobile stations execute a mutual authentication and key agreement protocol based on public-key cryptography (page 1252, Section 1).

Allowable Subject Matter

5. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 7 and 9-15 are allowable over the prior art of record.
